

AMENDMENTS TO THE SPECIFICATION

Kindly amend the paragraph beginning at page 8, line 4, as follows:

As PDE 5-inhibitors, PDE 5-inhibitors known as such from the above-mentioned documents and, due to their particular selectivity for PDE 5 as against other phosphodiesterases, in particular the following substances are suitable for the use according to the invention: Sildenafil (INN), i.e. 1-{{3-(6,7-Dihydro-1-methyl-7-oxo-3-propyl-1H-pyrazolo-[4,3-d]pyrimidin-5-yl)-4-ethoxyphenyl}sulfonyl}-4-methyl-piperazine (citrate), Tadalafil (INN), i.e. (6R,12aR-2-methyl-6-(3,4-methylenedioxyphenyl)-12,12a-dihydro-6H-pyrazino [1,2:1,2]-pyrido[5,4-b]indol-1,4(2H,3H)-dion, and Vardenafil (structures see U. Gresser and C. H. Gleiter above). These also include the modified and analogous forms of these substances, which are known to the skilled person and which are also attributed an inhibition of PDE 5.
